No. 3—SEPTEMBER 1959

Page

On the mechanism of cancer induction by ultraviolet radiation. II. A quantitative description and its consequences. HAROLD F. BLUM..... 319
On the mechanism of cancer induction by ultraviolet radiation. III. The growth curve. HAROLD F. BLUM..... 337
On the mechanism of cancer induction by ultraviolet radiation. IV. The size of the replicated unit. HAROLD F. BLUM..... 343
Inhibition and enhancement effects of hypochlorite on ascites tumor cell metabolism and growth, and on host resistance. JOHN LASZLO, DEAN BURK, and KENT WIGHT. [Plate 26]..... 351
Value of bone marrow and spleen cell suspensions for survival of lethally irradiated dogs. ROBERT D. SULLIVAN, GISELA STECHER, and STEPHEN S. STERNBERG..... 367
Some nutritional aspects of a 3′-methyl-4-dimethyl-aminoazobenzene-induced hepatoma *in vitro*. THOMAS A. MCCOY and MERLE MAXWELL..... 385
Electrophoresis of proteins of irradiated mouse chimeras. RAYMOND A. POPP and L. H. SMITH. [Plates 27–30]..... 395
Immunological studies with nucleoproteins from tissue-culture cells. II. Nucleoproteins from HeLa and H.Ep #1 cells. VITTORIO DEFENDI and JOHN S. COLTER..... 411
Recent changes in relative frequency of various histologic types of bronchogenic carcinoma. DAVID M. SPAIN..... 427
Growth inhibition of homografts of a plasma-cell neoplasm in cell-impenetrable diffusion chambers placed in hyperimmunized mice. GLENN H. ALGIRE. [Plate 31]..... 435
Early changes in the subcutaneous connective tissue of rats after implantation of pellets containing carcinogenic polycyclic hydrocarbons. JURY M. VASILIEV. [Plates 32–39]..... 441
Some problems in the estimation of familial risks of disease. WILLIAM HAENSZEL..... 487
Finding for uterine cancer from one or more cytologic examinations of 33,750 women. JOHN E. DUNN, JR., THOMAS A. SLATE, JOHN W. MERRITT, and PURVIS L. MARTIN..... 507
Effect on mice of oral painting of cigarette-smoke condensate. JOSEPH A. DIPAOLO and GEORGE E. MOORE..... 529
Influence of altered atmospheric oxygen on urethan-induced pulmonary tumors in mice. JOSEPH A. DIPAOLO..... 535
Distribution, retention, and elimination of C^{14}-3,4-benzpyrene after administration to mice and rats. PAUL KOTIN, HANS L. FALK, and RAY BUSSER.. 541
Long-continued function of normal blood-forming tissue transplanted into genetically anemic hosts. ELIZABETH S. RUSSELL, SELDON E. BERNSTEIN, FAY A. LAWSON, and LOIS JEAN SMITH..... 557
Mammary carcinogenesis by 3-methylcholanthrene. I. Hormonal aspects in tumor induction and growth. THOMAS L. DAO and HENRY SUNDERLAND. [Plates 40–41]..... 567
Growth inhibition of transplantable mouse lymphosarcoma by a filtrate from placental lysates. W. STEELE LIVINGSTON, LESLIE R. BENNETT, and BALDWIN G. LAMSON. [Plate 42]..... 587

No. 4—OCTOBER 1959

Relation of medical school teaching methods to student performance on a test of cancer knowledge. DONALD ROSS GREEN and LEONARD W. TOWNER.... 605
An appraisal of left and right breast cancer. LAWRENCE GARFINKEL, LEONARD CRAIG, and HERBERT SEIDMAN..... 617

Page

Investigation of tumor variants recovered from mice with systemic leukemia (L1210) after extensive therapy with 3′,5′-dichloroamethopterin and 3′-bromo-5′-chloroamethopterin. STEWART R. HUMPHREYS and ABRAHAM GOLDIN 633

Effect of trypsin on growth in several clones of tissue cells. DONALD M. PACE, LEFKOS AFTONOMOS, and WALTER M. ARTHUR. [Plate 43] 655

Attempts to reproduce cirrhosis of the liver in rats after total-body X irradiation. HAROLD W. CARROLL, ALFRED P. SPIVACK, and RALPH W. BRAUER .. 669

Effect of iodine on thyroid tumors induced in the rat by a low-iodine diet. H. ISLER. [Plates 44–46] 675

Cytology of rat liver cells during starvation and refeeding. T. P. BHARADWAJ and ROBERT LOVE. [Plates 47–50] 695

Studies of parotid-tumor agent in cultures of leukemic tissues of mice. CLYDE J. DAWE, LLOYD W. LAW, and THELMA B. DUNN. [Plates 51–67] 717

Localization of radioiodinated rat fibrinogen in transplanted rat tumors. EUGENE D. DAY, JAKOB A. PLANINSEK, and DAVID PRESSMAN 799

Comparison of the virulence of the mammary-tumor agent from four strains of mice. KATHARINE P. HUMMEL and C. C. LITTLE 813

Glycogen content of cell suspensions prepared from massive tissue culture. II. Comparison of fourteen cell strains after long cultivation *in vitro*. E. V. PEPPERS, B. B. WESTFALL, and W. R. EARLE 823

A study of the sensitivity of the mouse forestomach toward certain polycyclic hydrocarbons. FRED. G. BOCK and DOUGLAS W. KING. [Plate 68] 833

Topical effect of acriflavine compounds on growth and spread of malignant cells. HORACE GOLDIE, MATTHEW WALKER, THEODORE GRAHAM, and FRANK WILLIAMS. [Plate 69] 841

A study of aminopeptidase activity in the stroma of neoplastic tissue, with a comparison of histochemical techniques. G. G. GLENNER, M. S. BURSTONE, and D. B. MEYER. [Plates 70–72] 857

No. 5—NOVEMBER 1959

Delbert Mauritz Bergenstal. Obituary by CHARLES HUGGINS III

Cytochemical studies of milk-adapted murine lymphoma cells (strain P388 D_1) infected with polyoma virus. ROBERT LOVE and ALAN S. RABSON. [Plates 73–75] 875

Ultrastructure of primary culture amnion cells and transformed FL cells in continuous culture. JØRGEN FOGH and GEORGE A. EDWARDS. [Plates 76–85] 893

Mechanism of experimental tumorigenesis. I. Epidermal hyperplasia in mouse caused by locally applied tumor initiator and dipole-type tumor promoter. KAI SETÄLÄ, LAURI MERENMIES, LEO STJERNVALL, YRJÖ AHO, and PAAVO KAJANNE. [Plates 86–89] 925

Mechanism of experimental tumorigenesis. II. Effect of mole ratio distribution of Span 60 and Span 20 derivatives on hyperplasia in mouse epidermis. KAI SETÄLÄ, LAURI MERENMIES, LEO STJERNVALL, and YRJÖ AHO. [Plate 90] 953

Mechanism of experimental tumorigenesis. III. Effect in mouse skin of 1,4-sorbitan and 1,4,3,6-dianhydrosorbitol stearates. KAI SETÄLÄ, LAURI MERENMIES, LEO STJERNVALL, YRJÖ AHO, and PAAVO KAJANNE. [Plate 91] 969

Effect of air pollutants on ciliated mucus-secreting epithelium. HERTA M. TREMER, HANS L. FALK, and PAUL KOTIN. [Plates 92, 93] 979

Effect of cigarette smoke and its constituents on ciliated mucus-secreting epithelium. HANS L. FALK, HERTA M. TREMER, and PAUL KOTIN 999

Effect of enforced activity stress on the development of experimental papillomas in mice. JOHN A. STERN, GEORGE WINOKUR, DAVID T. GRAHAM, and ROBERT LEFTON 1013

Page

Chromosomal studies on primary methylcholanthrene-induced sarcomas in the mouse. K. E. Hellström. [Plates 94–96] 1019
Clonal analysis of variant cell lines transformed to malignant cells in tissue culture. Katherine K. Sanford, Ruth M. Merwin, Gwendolyn L. Hobbs, James M. Young, and Wilton R. Earle. [Plates 97–100] 1035
Influence of animal passage on a line of tissue-culture cells. Katherine K. Sanford, Ruth M. Merwin, Gwendolyn L. Hobbs, and Wilton R. Earle. [Plates 101–103] 1061
Glycolytic properties of high and low sarcoma-producing lines and clones of mouse tissue-culture cells. Mark W. Woods, Katherine K. Sanford, Dean Burk, and Wilton R. Earle 1079
Chromocenters resembling sex chromatin in human tissue-culture cell lines. Sarah H. DeWitt, Alan S. Rabson, Frances Y. Legallais, Pasco R. Del Vecchio, and Richard A. Malmgren. [Plate 104] 1089
Urate excretion in patients with acute leukemia. James F. Holland, William Sharpe, Louise M. Mamrod, Edward Dowd, and Marian Hartsock 1097
Hormonal influences on the growth of a transplantable mammary adenocarcinoma in C3H mice. Barbara B. Jacobs and Robert A. Huseby. [Plates 105, 106] 1107
Intracellular and extracellular particles in tissue cultures inoculated with parotid-tumor agent (polyoma virus). William G. Banfield, Clyde J. Dawe, and Darlene C. Brindley. [Plates 107–110] 1123
Survival of breast-cancer patients in Connecticut, 1935–54. Sidney J. Cutler, Fred Ederer, Matthew H. Griswold, and Richard A. Greenberg 1137
Morthologic changes in salivary-gland tissue of the newborn mouse exposed to parotid-tumor agent *in vitro*. Clyde J. Dawe and Lloyd W. Law. [Plates 111–116] 1157
Relative status of parity and genetic background in producing human breast cancer. Madge T. Macklin 1179
Announcements:
Three United States Medical Journals Honored 1191
NCI Monographs on Cancer Research 1191
Symposium on Fundamental Cancer Research 1192

No. 6—DECEMBER 1959

Genetic factors in parabiosis. E. J. Eichwald, E. C. Lustgraaf, and M. Strainer. [Plates 117–119] 1193
Changes in deoxyribonucleic acid content of rat liver cells during ethionine intoxication. J. Heinrich Holzner, Tibor Barka, and Hans Popper ... 1215
Mammogenesis and breast carcinogenesis in virgin female mice of BALB/c_f substrain with the milk agent. Francesco Squartini 1227
A graded-response assay for the Friend leukemia virus. Wallace P. Rowe and Isadore Brodsky 1239
Embryology of testicular teratomas in strain 129 mice. Leroy C. Stevens. [Plates 120–136] 1249
Genetic determination of sex-specific antigens. Allen S. Fox. [Plate 137] ... 1297
An examination of some experimental cancer data in the light of the one-hit theory of infectivity titrations. P. Armitage 1313
Peripheral blood changes and liver catalase response to isologously transplanted rat leukemia IRC 741. Paul E. Lutz, Edward Larson, and W. F. Dunning 1331
Effect of formaldehyde wound wash on development of local wound recurrences. Robert R. Smith and Edmund A. Gehan 1339
Some effects of cyclophosphamide (cytoxan) on normal mice and mice with L1210 leukemia. Montague Lane. [Plate 138] 1347

Page

Quantitative studies on Rous sarcoma virus. IV. An investigation of the nature of "noninfective" tumors induced by low doses of virus. ALFRED M. PRINCE 1361

Initiation and promotion activity of certain polynuclear hydrocarbons. HERBERT I. HADLER, VIOLET DARCHUN, and KATHARINE LEE 1383

Effect of bone marrow culture *in vitro* on its protective action in irradiated mice. DANIEL BILLEN. [Plate 139] 1389

Mortality in acute lymphocytic leukemia. PIERO MUSTACCHI, EDWIN M. SHONFELD, SALVATORE P. LUCIA, and NICHOLAS L. PETRAKIS 1397

Delayed mortality of radiation chimeras: a pathological and hematological study. M. J. de VRIES and O. VOS. [Plates 140–142] 1403

Oncogenic effect of tissue-culture preparations of polyoma virus on fetal mice. MEARL F. STANTON, SARAH E. STEWART, BERNICE E. EDDY, and ROBERT H. BLACKWELL. [Plates 143–149] 1441

Extent of nonspecific background localization of radioiodinated serum proteins in human tumor and normal tissues. EUGENE D. DAY and AHSEN ÖZARDA .. 1477
